

2024 Moses Lake Municipal Airport (W20)
Practical Air Show Egress/Ingress Procedures

Version 2 – 06-June-2024

At no time will the aircraft penetrate the TFR.

As all pilots are aware if a Temporary Flight Restriction (TFR) is penetrated the pilot will be violated.

The Moses Lake Municipal Airport runway falls just outside the 2024 Moses Lake Airshow Temporary Flight Restriction area that will be in place to support the Moses Lake Airshow.

The dimensions of the TFR are 5NM of **47 12 12N 119 19 53W** from the **surface to 15,000'**.

To continue safe operations at the Municipal Airport the following procedures are advised to be followed during the practice and show times for the event.

These timings include:

Friday, Saturday and Sunday – June 14, 15 & 16, 2024 between 12:00 and 17:00 (Local Time).

Egress Procedures:

If a pilot plans to leave the Moses Lake Municipal Airport (W20) they can take off and once at a safe altitude they should turn eastbound.

Following the turn, for safety, they should contact the Grant County International Airport (KMWH) Air Traffic Control Tower (ATCT) for further instructions. Frequencies below.

Ingress Procedures:

If a pilot plans to recover at the Moses Lake Municipal Airport (W20), for safety, they will remain outside the TFR area and they should contact the Grant County International Airport (KMWH) ATCT for arrival instructions before proceeding inbound for the Municipal Airport. Frequencies below.

No circuit or pattern work is able as this would take the aircraft into the TFR.

For both the egress and ingress procedures to the Moses Lake Municipal Airport (W20) it is strongly suggested for safety that all pilots be in contact with the KMWH ATCT.
